

# ASBESTOS *Be Protected Be Trained*

**Do you install grab rails in bathrooms or handrails in houses?**

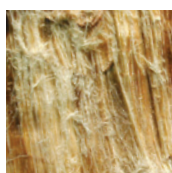

**Are you covered by following the correct Safe Systems of Work?**

**Do you comply with the asbestos regulatory requirements?**

**Are your Workers and Clients protected from the hazards of asbestos while installing the rails?**

The health of your workers and clients is extremely important and, as such, all HMMS must ensure they comply with all regulatory requirements with regard to asbestos. As a follow-on to the asbestos training delivered in 2007-2008, the NSW HMMS State Council will be running a 1 day asbestos safety training for Builders and Tradespeople in the HMMS industry in 2012. This training will introduce participants to:

- The WorkCover endorsed methods for drilling into asbestos wall sheeting
- The Personal Protective Equipment required to protect your workers and clients from the hazards
- The Safe System of Work and associated check lists with competency assessment

<b>Cost:</b>	<b>FREE for Members \$100 for Non-members</b>	
<b>Dates:</b>	<b>Metro Sydney</b>	<b>21/02/12 22/02/12 23/02/12</b>
	<b>Far North Coast &amp; Mid North Coast</b>	<b>06/03/12 07/03/12 08/03/12</b>
	<b>Central West and Orana Far West</b>	<b>20/03/12 21/03/12 22/03/12</b>
	<b>Southern</b>	<b>03/04/12 04/04/12 05/04/12</b>

#### **Venues:**

Venues are yet to be determined. Once participants have registered, venues will be arranged according to workshop size. Each participant will be notified of the workshop venue and time in their registration letter.
